Environment Engineers Metoc Appoints Mick Cook as Principal Advisor

UK environment engineers Metoc plc has appointed Mick Cook as principal advisor to the business in strategic growth and development.

Mick Cook combines 30 year's experience in geoscience and HSE , including from his previous role as managing director, operations, of RPS Energy, formerly Hydrosearch Associates, where he developed the company's operations in the international energy consultancy sector.

He is chairman of the IECO (International Energy Consultants Organisation) and is a Fellow of SUT (Society for Underwater Technology). He is also an active member of the SUT Offshore Site Investigation and Geotechnics committee and sits on the Oil & Gas Producers (OGP) sub-committee that is revising the international guidelines for offshore site surveys.

Kevin Deeming, Metoc's managing director, says: "I'm delighted that Mick has joined Metoc. Not only will he provide support to our fast growing geotechnics and geoscience team, but he will also provide invaluable advice to the board on the commercial and strategic development of the company."

Note for Editors

NEWS

UK environment engineers Metoc plc supports industry and Government in the development of infrastructure resources based on a full understanding of the financial, environmental, and engineering issues. The objective is to reduce risks and costs of each project and so maximise the return on investment, whilst minimising the impact on the natural environment.

Metoc has 25 years experience in working worldwide as advisers and project managers on infrastructure projects in the marine, coastal and river environments. This has ensured a detailed understanding of clients' needs and the critical interface where engineering meets the environment.

Capabilities in consent delivery and engineering support, combined with high-level project management experience, enable Metoc to prevent costly dislocation throughout a project's life-cycle.
